

3Kings - TeachBack Mentor

- Track D3: hoc bang cach day
- SPEC -> Prototype -> Demo
- Lop 3B - E402

Problem and Evidence

- K4 tutor turns: 3,097
- ask_probing_question: $6 / 3,097 = 0.19\%$
- Direct explanation style: $448 / 457 = 98.03\%$
- Pain: learner may think they understand before applying.

One-Sentence Slice

- Learner teaches Bi why LLMs hallucinate.
- AI checks explanation against 4 transcript ideas.
- Bi asks at most 2 probing questions without leaking answers.
- Outcome: learner knows what to review.

Prototype

- Static web app in codebase/
- Mock mode: rule-based engine runs locally.
- Live mode: LLM call through provider adapter.
- Trace drawer stores prompt, raw response, parsed JSON, guard.

Evaluation

- Golden set: 25 cases in eval/golden_set.json
- Run 1 mock/live JSON kept in eval/
- Current mock tests expect 25/25 on rule-v1.1
- Evaluation data pack stays local and ignored under eval/data/.

Validation and Demo

- R6 logs belong in validation/
- Need 5 outside users, 2 declared from CP1.
- Record task, blocker, verbatim quote, and decision.
- Reflection files live in reflection/.
